Cost Insight

“Elevators can account for up to 5–10% of total building costs.”

At Dabujii, we focus on optimizing this cost without compromising performance or safety.

Practical Reality

“The most expensive elevator is not the one you buy, it’s the one you can’t maintain.”

We prioritize systems with locally available parts and technical compatibility.

Industry Truth

“Elevator downtime impacts tenant satisfaction more than most building features.”

Reliability isn’t a luxury—it’s a necessity.

Speed vs Cost

“Faster procurement doesn’t always mean higher cost.”

With the right sourcing channels, projects can save both time and money.

Our Story

Dabujii Elevators was established to solve a critical gap in the African construction market: access to reliable, cost-efficient elevator systems without compromising long-term performance or maintainability.

Many developers face challenges at the procurement stage—ranging from incorrect system specification and limited serviceability to long-term cost inefficiencies.

Dabujii exists to eliminate these risks by ensuring that every elevator decision is technically sound, commercially practical, and aligned with the realities of the local market.

We operate at the intersection of global manufacturing networks and local technical intelligence, enabling developers to access proven, non-proprietary elevator systems that align with real project constraints—budget, timelines, and long-term serviceability.

Our model is simple but powerful;

Make the right elevator decisions at the start so developers avoid costly mistakes later.

Founder & Industry Experience

Dabujii is led by a founder with hands-on experience in the elevator industry since 2019, with involvement in the successful delivery of 300+ elevator units across Kenya.

Her expertise spans the full lifecycle of elevator delivery:

- > Traffic Analysis & Planning
- > Early-Stage Design Advisory
- > Modern Building Integration
- > Commercial Cost Engineering
- > Shaft Surveys & Installation Readiness
- > Elevator Interior Design

This combination ensures every project is both technically correct and financially

300 +
*Elevator Units
Across Kenya.*

Our Vision

To be Africa’s leading elevator solutions company, recognized for delivering intelligent, practical, and cost-efficient vertical transportation systems.

We sit between manufacturers & contractors protecting the client’s interest.

Our Mission

To provide practical, high-performance elevator solutions by:

Technically correct from the start

Commercially aligned to project realities

Built for long-term performance and maintainability

What We Do

Dabujii Elevators identifies and delivers carefully vetted elevator systems that are proven to meet project requirements, cost targets, and long-term operational performance.

Long-Term Value

The right decision at the start defines long-term performance.

Elevator Supply (Core Offering)

We source and deliver carefully vetted, globally manufactured elevator systems across:

- > Passenger Elevators
- > Freight Elevators
- > Hospital Bed Lifts
- > Home Lifts
- > Car Lifts

Technical Advisory & System Optimization

We guide critical decisions through:

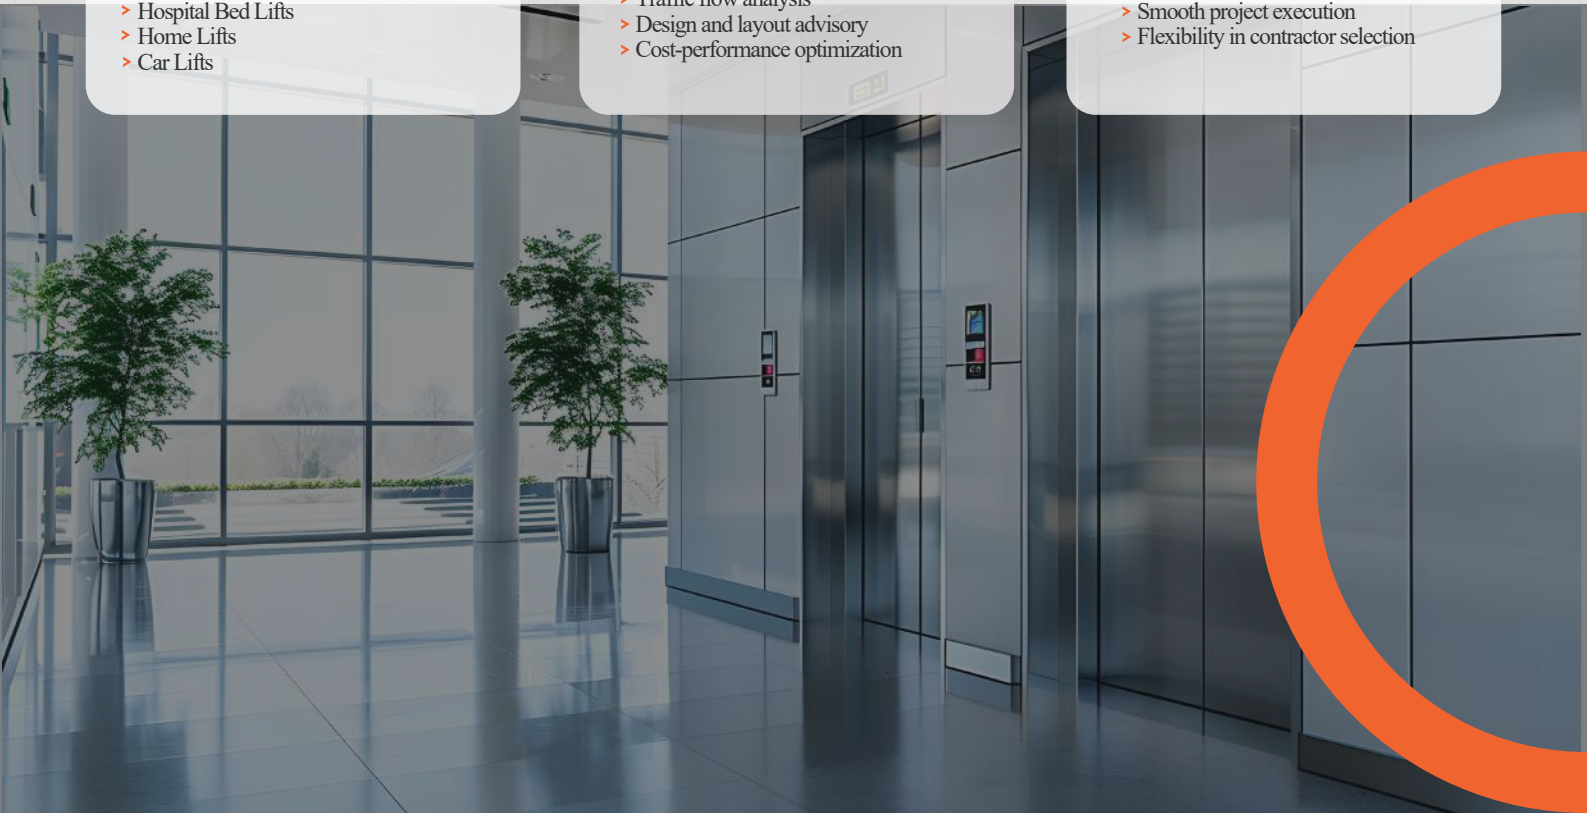

- > Product specification and configuration
- > Traffic flow analysis
- > Design and layout advisory
- > Cost-performance optimization

Installation Coordination

Through trusted local partners, we ensure:

- > Proper installation
- > Smooth project execution
- > Flexibility in contractor selection

Each system is selected based on real-world performance, not just specifications.

Our Approach

1

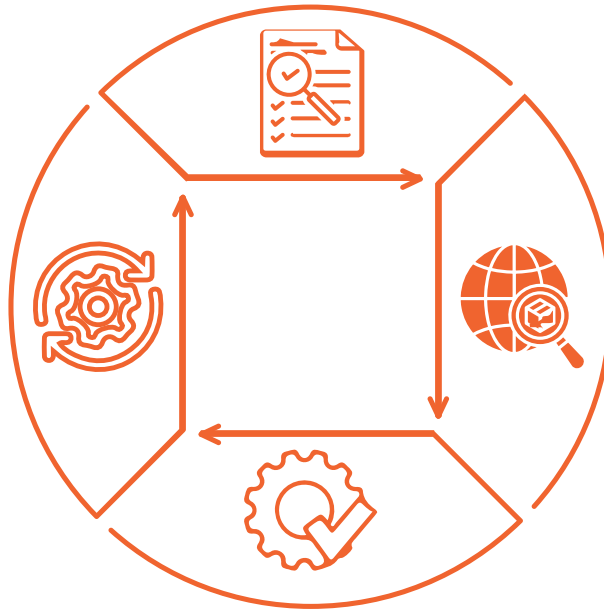

Project Assessment

We evaluate building type, traffic flow, and budget constraints.

Direct Global Sourcing

We leverage international supplier networks to secure quality systems at competitive pricing.

3

2

Smart System Matching

We identify the most suitable systems based on performance, practicality, and local compatibility

Delivery & Execution Support

We coordinate logistics and support installation teams to ensure smooth delivery.

4

Experience

300 +

Units Delivered
(Founder Experience)

130 +

Units Imported
(Company Track Record)

35 +

Developments Supported

Across residential, commercial, hospitality, mixed-use & institutional projects.

Why Dabujii

We are built for developers who value clarity, cost control, and long-term reliability.

- **Cost Intelligence:** Every decision is financially optimized
- **Technical Accuracy:** Right system, right configuration from the start
- **Global Access:** Direct manufacturer relationships
- **Execution Flexibility:** Works with multiple contractors
- **Lifecycle Thinking:** Designed for long-term performance and serviceability

We don't just supply elevators, we ensure the entire system works, from procurement to long-term operation.

Why Dabujii Exists

Dabujii Elevators exists to bridge the gap between global elevator manufacturing and local project realities.

We ensure that developers avoid common industry pitfalls such as:

- Incorrect system selection
- Overdependence on proprietary systems
- Poor alignment with local installation and maintenance capabilities
- Unexpected long-term costs

Our role is to ensure that every elevator solution is:

- Fit for purpose
- Locally supportable
- Commercially sustainable

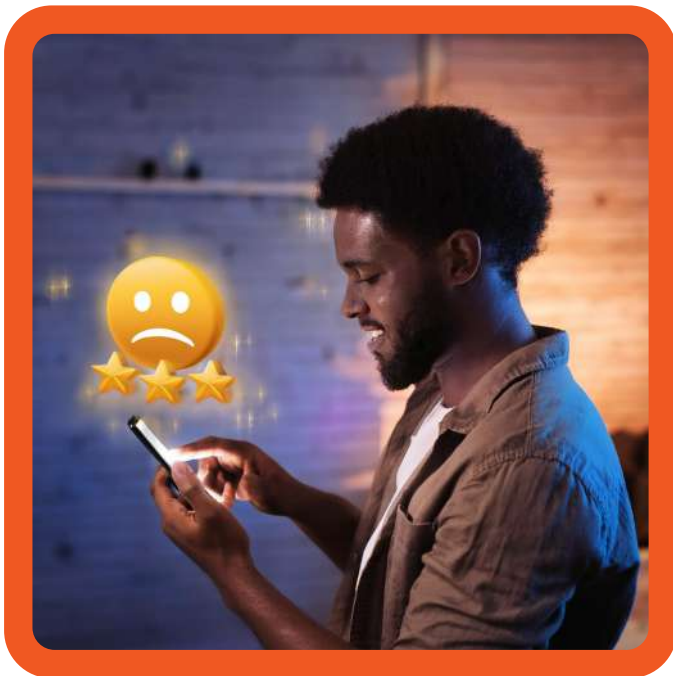

In simple terms:

Dabujii ensures that what is specified, supplied, and installed continues to perform reliably for the life of the building.

Client Impact

- **Up to 30% reduction in procurement costs**
- **Zero proprietary lock-in**
- **Full compatibility with local maintenance providers**
- **Reduced risk of redesign, delays & technical failure**
